DOLAPO MERCY ONIPEDE

Data Analyst | SQL • Power BI • Python • Excel
+234 916 895 2696 • dolapoonipede1@gmail.com • Akure, Ondo State, Nigeria
LinkedIn: linkedin.com/in/theglobaldolapo • GitHub: github.com/dolapoData

PROFESSIONAL SUMMARY

Detail-oriented data analyst with hands-on experience in SQL, Excel, Power BI, and Python, backed by a public GitHub portfolio of end-to-end projects. Experienced in designing relational databases, writing aggregation-heavy queries, building ETL summary tables, and turning results into dashboards and business recommendations (hospital revenue, retail orders, banking transactions). Currently teaching data analytics, which sharpens my ability to explain findings clearly to non-technical audiences. Physiology background brings strong research methods and biometry training.

EXPERIENCE

Data Analyst Instructor *Nov 2025 – Present*
Voks Technologies — Akure, Nigeria

- Teach applied data analytics across Excel, SQL, Python, and Power BI, taking learners from data cleaning and querying through to dashboards and reporting.
- Build lesson plans, exercises, and real-world datasets that mirror practical business analysis tasks.
- Mentored a cohort of 5 students, guiding them through data analysis concepts, tool usage, and project-based assignments.
- Translate complex analytical concepts into clear, step-by-step explanations, the same skill needed to present findings to non-technical stakeholders.

SKILLS

TECHNICAL SKILLS

- SQL (SQLite / SQL Server / MySQL)
- Python (Pandas, NumPy, Matplotlib)
- Microsoft Excel (Advanced)
- Power BI
- Data Visualization & Dashboard Design

CORE COMPETENCIES

- Analytical Thinking & Problem-Solving
- Research Methods & Biometry
- ETL & Data Pipeline Design
- Data Storytelling & Reporting
- Team Collaboration & Communication

PROJECTS

Hospital Patients Record Analysis | SQLite, Power BI *2026*
github.com/dolapoData/Hospital-Data-Analysis-Project

- Built an end-to-end analytics framework for a hospital dataset of 974 patients, 28K+ appointments, and $67.89M in total revenue, sourced from Kaggle.
- Designed a normalized relational schema across 5 core tables (patients, appointments, treatments, payers, billing) using SQLite.
- Developed ETL summary tables and SQL aggregation queries to analyze patient demographics, encounter trends, payer performance, and treatment costs.
- Built an interactive Power BI executive dashboard with KPI cards, dynamic slicers, and visual breakdowns of revenue, operations, and patient profiles.
- Identified key insights on revenue risk from uninsured patients, repeat patient retention, and facility bottlenecks in high-load organizations.

Northwind Business Analysis | SQLite, Excel *2026*
github.com/dolapoData/Northwind-SQL-Business-Analysis-Project

- Analyzed 830 orders and 126.6K in revenue from the Northwind retail database, writing SQL (aggregations, GROUP BY, HAVING, NULL handling) to answer 10 business questions.
- Found that a small group of repeat customers drives a large share of orders, activity is concentrated in Brazil, France, and Germany, and 21 orders remain unshipped.
- Flagged missing region data as a data quality risk, exported results to Excel, and built charts to present recommendations on retention, expansion, and fulfillment.

Simple Banking System | SQL Server (SSMS) *2026*
github.com/dolapoData/Simple-Banking-System-Sql

- Designed and implemented a relational database simulating core banking operations including accounts, customers, and transactions.
- Built and queried tables using SQL Server Management Studio (SSMS), applying joins, aggregations, and integrity constraints.
- Wrote 10+ queries covering joins, subqueries, aggregations, and HAVING clauses to simulate real-world banking transactions and reporting.

Python Code Quality Analyzer | Python, Jupyter *2026*
github.com/dolapoData/Python-Code-Quality-Analyzer

- Built a rule-based Python tool (standard library only) that extracts metrics from source files and computes a weighted 0-100 quality score with severity ratings.
- Validated the scoring logic on sample files at three quality levels and generated automatic recommendations.

EDUCATION

Bachelor of Science (B.Sc.) in Physiology 2023 - 2026
Federal University of Technology, Akure (FUTA), Ondo State, Nigeria

West African Senior School Certificate (WASSCE) 2015 – 2021
Federal Government Girls' College, Akure, Ondo State

CERTIFICATIONS

Data Analytics Essentials — Cisco Networking Academy *October 2025*
Soft Skills Training — Jobberman / Young Africa Works *2025*
SQL Study Group — SmartBiz Crux Technologies *2026*

LANGUAGES

English (Fluent — Written & sSpoken) **Yoruba** (Native Proficiency)
